

**Final Report to the Newfields Conservation Commission**

**Conservation Easement Stewardship and Monitoring**

**and**

**Assessment of Newfields Conservation Lands**

**and Other Open Spaces**

Prepared by:

Ellen Snyder  
Ibis Wildlife Consulting  
26 Johnson Drive, Newmarket, NH 03857

This project was funded by

Newfields Conservation Commission

and

New Hampshire Estuaries Project, as authorized by the  
U.S. Environmental Protection Agency's National Estuary Program

January 2, 2009

Ibis Wildlife Consulting worked with the Newfields Conservation Commission to ensure that the town meets sound easement stewardship practices. Project components involved preparing monitoring plans for seven conservation easements, completing two easement baseline documentation reports, completing an inventory of existing conservation lands in town, and completing an annual easement monitoring report for five conservation easements.

Tasks 1-3 were funded by the New Hampshire Estuaries Project and Task 4 was funded by the Newfields Conservation Commission. A DVD with copies of all project files is included with this final report to the Town of Newfields and to the NHEP.

Specifically, the following tasks were completed as described:

**Task 1    Review of conservation easement documents and preparation of recommendations for easement monitoring and document filing**

Based on a review of the permanent files at the Town Hall maintained for each of the seven town-held conservation easements and based on the 2008 annual monitoring reports for each of the seven easements, a set of recommendations is provided with this report.

The permanent files at the Town Hall are generally well-organized and fairly complete for the Anderson, Daley, Gilmore, and Moore easements. The Haughton, Cole, and Piscassic Greenway easements permanent files are less organized and less complete. A summary sheet listing the documents in the permanent file for each conservation easement is included with this report. A field file was created for each of the seven conservation easements that can be taken into the field during a monitoring visit. These field files were stored with the permanent files at the Town Hall. Landowner and Selectmen signatures were obtained for the Anderson, Daley, and Moore Baseline Documentation Reports completed by Chris Kane in 2006.

**Task 2a    Completed Baseline Documentation Report for the Haughton conservation easement**

A Baseline Documentation Report was completed for the 11-acre Haughton conservation easement held by the Town of Newfields. The NH Department of Environmental Services provided partial funding for the acquisition of this easement. A copy of this baseline documentation report, therefore, was sent to NH DES to fulfill part of the grant agreement. The original copy of the baseline report, signed by the landowner and the town, was filed at the Town Hall. A copy was provided to the landowner and is also included in this final report to NHEP. Based on the site visit a 2008 annual monitoring report was also completed for this conservation easement with copies to the landowner, NH DES, and Town file.

**Task 2b Completed a Baseline Documentation Report for the Gilmore (Silverstein) conservation easement**

A Baseline Documentation Report was completed for the 30.97-acre Gilmore (Silverstein) conservation easement held by the Town of Newfields. A baseline documentation report was not completed prior to a change in ownership of this property. The new owners (Silverstein) opted not to sign this baseline documentation report. The original copy of the baseline report, signed by the town, was filed at the Town Hall. A copy was provided to the current landowners and is also included in this final report to NHEP. Based on the site visit a 2008 annual monitoring report was also completed for this conservation easement with copies to the landowner and Town file.

**Task 3 Completed an inventory of town conservation lands and other open spaces**

An inventory of town conservation lands and other open spaces was completed by researching the Town computer database, NH GRANIT, and the Rockingham Registry of Deeds. Based on this research, I created a spreadsheet for each of the following types of open space:

- Town-owned conservation lands
- Town-held conservation lands
- Other conservation land – non-town
- Subdivision open spaces
- Other town-owned lands or easements

A GIS map, using the tax parcel map as a base layer, was created showing the five different ownership types listed above. This map can be modified and updated as more information becomes available. Some information in the NH GRANIT mapper is incorrect. A list of changes related to Newfields is included here in the list of recommendations. This list will be submitted to the appropriate entities for update.

**Task 4 Completed an annual monitoring report for five town-held conservation easements**

An annual monitoring report, including a site visit, was completed for the following town-held conservation easements:

- Anderson conservation easement (31 acres)
- Cole conservation easements (2 easements; 69 acres)
- Daley conservation easement (80 acres)
- Moore conservation easement (40 acres)
- Piscassic Greenway conservation easement (316 acres)

Copies of the monitoring reports were provided to the respective landowners and were filed at the Town Hall. A copy of the Cole Farmland Easement monitoring report was submitted to the USDA Natural Resource Conservation Service per the deed requirement. A copy of the Piscassic Greenway monitoring report was provided to the NH DES per the funding agreement.

## **Recommendations to the Newfields Conservation Commission**

### **Conservation Easement Stewardship and Monitoring**

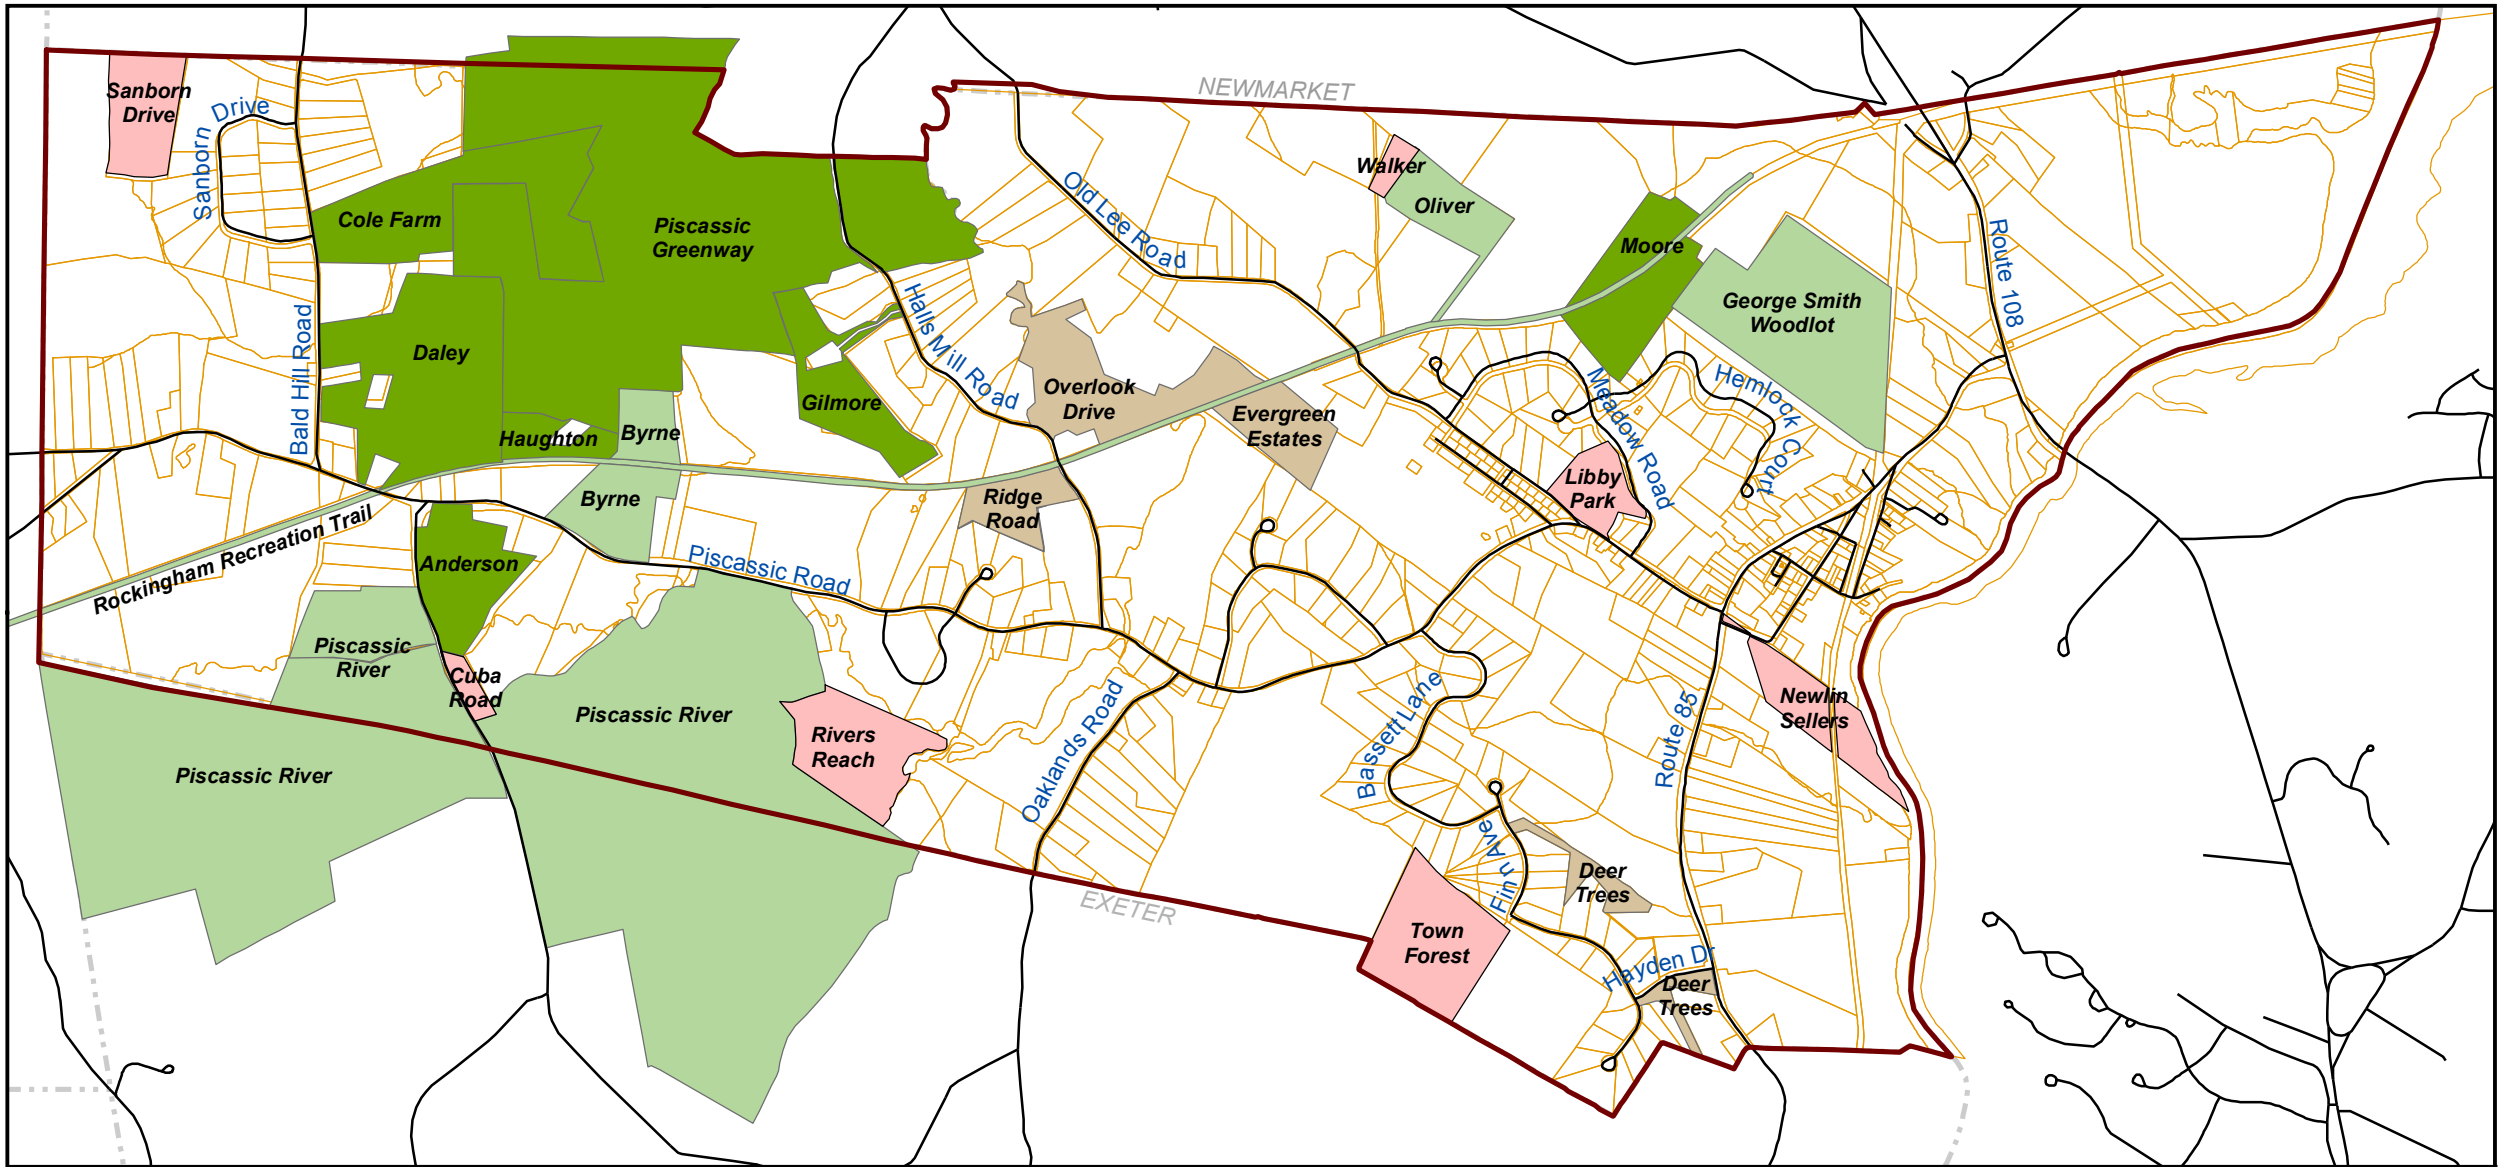

- Locate the seven original signed and recorded conservation easement deeds. Only the Piscassic Greenway original conservation easement deed is in the file. This and the other originals should be kept in a fire proof cabinet. Any other documents with original signatures should also be kept in fire proof storage.
- Survey and monument the exclusion areas for the Anderson and Moore easements.
- Consider more permanent and visible ways to monument the exclusion areas for the Daley easement. Any original exclusion area monuments may be buried or missing.
- Consider erecting “Newfields Conservation Easement” signs along boundaries of easements that are open to the public (i.e., Moore and Anderson). The Cole and Piscassic Greenway lands are already signed by the Southeast Land Trust. Daley and Gilmore (Silverstein) are not open to the public.
- Consider working with the Silversteins (Gilmore easement) to better monument the eastern boundary (south of the driveway) of the property/easement.
- Annually monitor each of the seven conservation easements. Provide copies of the report to the landowner and the original should be kept in the permanent file at the town hall. A copy of the Cole farmland monitoring report should be sent to the NRCS in Durham, NH. Copies of the Piscassic Greenway and Haughton monitoring reports should be sent to NH DES.
- Ask volunteers, consultants, and town officials to leave the permanent file at the town hall and use only the field file for the annual monitoring visit.
- Ensure that a copy of the Piscassic Greenway management plan and associated planning documents from the Southeast Land Trust of NH are added to the Piscassic Greenway permanent file at the Town Hall. Most of this information is not in the file. A further organizing of the Piscassic Greenway permanent file would be helpful to future Commission members.
- Continue to work collaboratively with the Southeast Land Trust of NH to implement the Management and Stewardship Plan for the Piscassic Greenway.

## **Town-Owned Conservation Lands**

- Maintain, update, and modify as needed, the spreadsheet and GIS map of town-owned conservation lands.
- Take steps to ensure that these lands are designated and recognized as conservation lands by town decision-makers and residents.
- Periodically monitor these properties to ensure that conservation purposes and values are protected.
- Evaluate other town-owned lands to assess whether other parcels should be considered as conservation lands.
- Work with the Newfields Village Water and Sewer District to understand and support wellhead protection areas and ensure long term stewardship.
- Work with other conservation partners to update and maintain accurate information in the NH GRANIT data mapper. The following changes are needed to the existing GRANIT data layer:
  - The 41-acre “town forest” off Connor Lane in Deer Trees is labeled as “Inland Acres Town Forest” in the NH GRANIT. Is this an accurate name?
  - Daley CE shape file is incorrect. Provide corrected shape file
  - NH GRANIT includes a parcel labeled “Cheney-England”; the GRANIT database indicates that this is owned by TNC. This is incorrect. This parcel is in private ownership and is only protected through a deed restriction. Change to “subdivision open space” and label as “Ridge Road Open Space” and indicate it as privately owned, deed restricted. Provide corrected shape file.
  - Add to NH GRANIT the Overlook Drive Open Space lands: Map 208 Lot 4 43.3 acres; homeowner association
  - Check Town Planning Board files regarding the “Evergreen Easement”. No record in the Rockingham Registry of Deeds that this parcel was conveyed in fee or easement to the Town as required by the subdivision plan. This parcel (Map 209 Lot 4, 18.31 acres) listed as owned by Evergreen Estates, LLC.
- Consider creating permanent files at the Town Hall that contains information (e.g., deeds, surveys, etc) about each of these conservation land parcels.

## **Subdivision Open Spaces**

- Work with town officials to ensure that Map 209, Lot 4, 18.83 acres is conveyed to the town in fee or easement as required by subdivision approval. See D-32226 and Book 4407 Page 1646. This parcel is shown as conserved in NH GRANIT but no recorded deed to indicate conveyance to the town.
- Review the Ridge Road subdivision open space to understand town's role and interests in this open space (Map 209 Lot 25.4, 13.37 acres).
- Consider creating permanent files at the Town Hall that contains information (e.g., deeds, surveys, etc) about each of these open space parcels.
- Work with the Newfields Planning Board to ensure that any open space associated with future subdivisions is clearly delineated and appropriate transfers of interests are completed and recorded and a shape file with associated information is provided to NH GRANIT. This can be a required element in the subdivision approval process.

## Newfields Conservation Lands and Other Open Spaces Newfields, NH

- Newfields Conservation Lands
- Newfields Conservation Easements
- Other Conservation Land-Non Town
- Subdivision Open Space
- Newfields Town Boundary
- Newfields Tax Parcels
